The Directors of The American Iris Society have granted permission to reprint this specialized Check List, using as source material the following:

Iris Check Lists 1939 - 1999
Registrations and Introductions in 2000 - 2005

Editorial Committee
Jennifer Hewitt, Judy Hollingworth, Robert Hollingworth, Anna Mae Miller
E. Roy Epperson, Editor

To contact the Editor of this 2006 Check List (a continuation update of the first Check List published in 1975) with additions or corrections, phone, write, or e-mail to:

Dr. E. Roy Epperson
1115 Delk Drive
High Point, NC 27262-3419
Phone: (336) 883-9677
e-mail: kirklee@triad.rr.com

HOW TO READ THIS CHECK LIST

1. NAME of Registered Irises, and names approved as official prior to the days of registrations are listed in capital letters, and in BOLD type: ALTER EGO. Varietal names of unregistered Irises in commerce are in lower case letters, as in Corey's Pink.
2. Hybridizer's name, if one is known, or the collector who first recorded the find in older varieties. If registered by other than the originator, two sets of names are given, as in "Warburton, B. by Schafer/Sacks".
3. Next follows the information whether the variety was registered, printed as Reg., or as in the case of older varieties, Listed, which designates it as a valid AIS approved name, followed by the year of registration or approval.
4. Seedling number if known.
5. Type of iris: SIB = Siberian, CALSIB = Calsib, etc., followed by (dip.) Diploid, (tet.) Tetraploid, 40 Chromosome, sino-sib. SPEC-X designates inter-species crosses, with one parent a siberian, the other another species. .
6. Height (36" 91 cm). As growing conditions vary, this gives an idea of what proportional height the variety should have; and where to plant in your beds.
7. Bloom season, using the standard format, E, M, L, etc. In addition, repeaters are designated RE if registered as a repeat bloomer, and re if reports indicate a strong tendency to repeat bloom. (Normally starting 2-3 weeks after first bloom).
8. Description. Supplemental information and said source used in some lacking information.
9. Parentage, using the standard procedure of listing Pod parent first, followed by an X and then the Pollen parent. In complex parentage, a small x is used between pod and pollen Grandparents.
10. Who introduced the variety, and in what year. If no information is available, but the variety is in commerce, it is marked "?? In Commerce".
11. Honors and Awards given the variety internationally

SIBERIAN IRIS CHECK LIST

ABBREVIATIONS USED

AGM	Award of Garden Merit of the RHS and BIS
AIS	American Iris Society
AM	Award of Merit of The American Iris Sociaty
BIS	British Iris Society.
CALSIB	A hybrid between 40 chromosome siberian (sino-siberians) and Californicae (CA) more commonly known as Pacific Coast Natives (PCN)
CL	Checklist (referring to earlier editions)
cm	Centimetres (1" = 2.54 cm).
dip	Diploid (Having two sets of chromosomes)
E	Early Bloom Season.
EC	Exhibition Certificate. The judges liked a seedling at a show, and at least five sent in votes.
F.	Falls, referring to the lower petals of an iris.
HC	High Commendation: An AIS garden award for unintroducted varieties, considered a recommendation for introduction.
HM	Honorable Mention, the first AIS garden award for introduced varieties.
inv.	Involving; involved. Used in mixed parentage.
JC	Judges Choice. Received the most votes in its category.
L	Late Bloom Season.
Listed	An approved name, although never registered with AIS. Used mainly for species, and introductions prior to 1920
M	Mid season bloom.
M & P	Maerz & Paul Dictionary of Color.
PCN	Pacific Coast Natives, correctly called californicae (CA)
Reg.	Registered with AIS as an official name.
RE	Registered repeater or rebloomer; more than one bloom season
re	Reported to repeat or rebloom by growers after introduction
RHS	Royal Horticultural Society. Used most often in color descriptions, as in (98A) or (107A/B), referring to a chart of numbered colour samples.
S.	Standards, or the upper petals.
sdlg.	Seedling.
SIB	Siberian Iris.
sib	Sibling; from the same cross by the hybridizer.
SPEC-X	A hybrid between a Siberian and some other species.
SIB-SP	Designation given to a Species as collected in the wilds.
SIBTOSA	A hybrid between I. sibirica X I. setosa
ST	Selected for trial by the R.H.S.at Wisley, England.
Tet	Tetraploid (Having four sets of chromosomes)
VE	Very early bloom season (sometimes EE).
VL	Very Late bloom season (sometimes LL).

ABENDKLEID Winkelmann, Artur Reg. 1988 Sdlg. 26183 SIB (dip.) (28" 70 cm) L. Lightly ruffled violet, few darker veins around small white signal. Unknown parentage.

ABITIBI Preston, Isabella Reg. 1930 Sdlg B1L SIB (dip) L B1L. "sibirica maxima" X Snow Queen. Kellogg 1932

ACTIVE DUTY Stahly, Harold Reg. 1999 Sdlg 92-36 SIB (dip) (37" 94 cm) M Deep wine-red (deeper than RHS 89A), F. with green throat, white signal with slight blue halo; style arms slightly lighter wine red, midrib deeper. Temper Tantrum X unknown. Stahly 1999.

ACROSS THE WIDE MISSOURI Helsley, Calvin Reg. 2005 Sdlg. 05-14 SIB (dip.) (24" 64 cm) ML. S. and style arms medium violet, S. very wide, recurved back against F., F. medium blue-violet, signal small, white, nearly hidden. Ships Are Sailing X Where Eagles Dare.

ACUTA Collected: Willdenow Listed 1813 SIB (dip) L Listed in 1939 CL as collected by Karl Ludwig Willdenow in 1813, a German Botanical author: (1765 - 1812). Listed by Barr & Sugden 1879-81: S. & F. blue, reticulated white; 36". Wallace: 1900,1913: dwarf, distinct, S. & F. blue, reticulated white. Perry: Catalog 186 & 194 (between 1916-1922): White. Bunyard: 1935: very dwarf, very dark blue, 18". Additional information from Jennifer Hewitt from research in RHS Library, from actual catalogs on file.

ADELIA GALAS Galas, Frank C. Reg. 1987 Sdlg T4W-87 SIB (tet) (32" 81 cm) E Lightly ruffled white, small yellow signal; slight sweet fragrance. White sdlg. X self.

ADJ McEwen, Currier Reg. 1983 Sdlg T(1)-72/109(2) SIB (tet.) (30" 76 cm) LM-L S. dark violet-blue (RHS 89A); F. same with a narrow edging of yellow (9C), fading to silver by 2nd to 3rd day; yellow (9C) signal with white tip. Sally Kerlin X Cambridge. Seaways Gardens 1983.

ADOLF SVOBODA Kondratas, Edmundas Reg. 2004 Sdlg. Lit-EK-98-10 SIB (tet.) (48" 122 cm), M. S. light blue with darker veining, prominent midrib; style arms violet-blue; F. medium blue, brighter around signal, signal light cream, almost white. Parentage unknown; seed from Currier McEwen.

ADRENALINE RUSH Hensler, Christy Ann Reg. 2000 Sdlg. 92JSIB SPEC-X (48" 122 cm) EM S. light blue-violet, center veined blue; stylearms lighter blue-violet, gold at hafts. Unknown JI X unknown SI. Rock Garden 2001 (Ed. Some doubt has been expressed about the interspecific nature of this cross, Fulton et al, AIS Bulletin, October 2002.)

AEGEA Spender, Major R. E. S. Reg. 1943 SIB 40 X 28 Chrom Cross L B1D. (Emperor x sdlg) X I. chrysographes. Spender 1943.

AGAIN McEwen, Currier Reg. 1984 Sdlg T(3)-79/30 SIB (tet.) (19" 48 cm) E-L & RE S. light violet-blue (RHS 94D); only white edge of signal is visible; F. same with wide veins of darker violet-blue (94B), giving overall effect of (94C). T(2)-75/119E: (Welcome Return x self) X T(2)-75/4B: (Welcome Return x T(1)-72/139(1):(68/78RK(5) x My Love). Seaways Gardens 1984

AHALYA Nesmith, Mrs. Thomas Reg. 1932 SIB (dip) R1L. Unknown parentage. Nesmith 1932

AHRTALWEIN Tamberg, Tomas Reg. 2001 Sdlg. SSTT509 SIB (35" 90 cm) M. S. light wine red, upright; F. light wine red, white signal, semi-flaring. SSTT266: (McEwen wine red sdlg. x 8253c (conversion):"Apfelbluete", Steiger wine red sdlg. X Wine Wings)) X wine red sdlg. Tamberg 2002

AINDLING GOLDAUGE Winkelmann, Artur Reg. 1992 Sdlg F2 N3 87 SIBVER (tet.) (23" 60 cm) M-L Dark violet, large yellow signal with thin white inner band. Neidenstein X Unknown.

AINDLING LIBELLE Winkelmann, Artur Reg. 1992 Sdlg FWhN4 SIBVER (tet.) (23" 60 cm) L Violet self, yellow signal, veined white and violet; light violet styles; yellow foliage in spring. Fourfold White X Neidenstein.

AINDLING MORGENSTIMMUNG Winkelmann, Artur Reg. 1992 Sdlg F2N7 87Ha SIBVER (tet.) (27" 70 cm) VL Medium violet-blue self. Neidenstein X Unknown.

AINDLING ROHRSAENGER Winkelmann, Artur Reg. 1992 Sdlg F2 N16 SIBVER (tet.) (20" 50cm) E Violet self, yellow-white signal; light violet styles. Neidenstein X Unknown.

AKRON Auten-Schroeder Reg. 1943 SIB (dip) B1D. Unknown parentage. Not Introduced (1949 CL)

ALBA GRANDIFLORA Farr, Bertrand Listed SIB (dip) White self. Erroneously listed by Farr as I. siberica 'alba grandiflora.' Unknown parentage. Rainbow Iris Gardens 1912.

ALBESCENS Villmorin Nursery Listed 1932 SIB (dip) W1. Registration was omitted from 1939 CL but was noted in 1949 CL. Unknown parentage

ALICE MAE COX Briscoe, H. E. Reg. 1984 Sdlg 776A SIB (dip.) (30" 76 cm) LM Deep true blue (RHS 94A) self, F. 1.5" wide; S. are held at 45 degree angle. Polly Dodge X 71-4: (Sparkling Rose x P. Hutchinson 6779). Borbeleta Gardens 1985 HM 1989

ALI'I Smith, Marky Reg. 2004 Sdlg. S96-38T SIB (dip.) (32" 81 cm), M. S. medium thistle-mauve (RHS 87C); style arms same, crests darker (87A), thin dark violet midrib; F. blended violet (88B), darker texture veins, right side of fall is mauve (87A), white dashed signal; some ruffling. Bauer/Coble S85HEM-R: (Lavender Bounty x Temper Tantrum seedling) X Careless Sally. Aitken's Salmon Creek Garden 2005

ALL IN STIPPLE Warburton, Mrs. F. W. (Bee) Reg 1983 Sdlg ARV-80-12 SIB (dip.) (38" 97 cm) M-L S. marked violet-blue (RHS 93B) on lighter (93C/D) ground in tweed-like fashion, rimmed dark violet-blue (93A/B); F. same, tweed-like rim circling white sunburst signal that is mostly concealed by pearly styles. Atoll X Ruffled Velvet. Warburton 1984

ALLEY OOPS Borglum, Dana Reg. 2000 Sdlg A006 SPEC-X (18" 46 cm) EM. S. and stylearms light blue; F. yellow, blue veining, foliage tall, ribbed center. Parentage unknown -- presumed Siberian X I. pseudacorus. Borglum 2002

ALMA BLUE Bush, George C. Reg. 1986 Sdlg 49-48 SIB (tet.) (34" 86 cm) M Light blue; white and green signal. Unknown parentage. Bush 1986 EC 1985.

ALMOST A MELODY Miller, Anna Mae Reg. 1987 Sdlg 78.11.6 SIB (dip.) (23" 58 cm) ML S. medium purple; F. velvety purple (darker than RHS 91C), edged a little lighter, medium purple signal. Dreaming Spires X Ruffled Velvet. Old Douglas Perennials 1988.

ALTER EGO Hager, Ben Reg. 1979 Sdlg SB81LtB1 SIB (dip.) (34" 86 cm) M S. light blue; F. light blue, blended deeper; cream signals. Super Ego X Swank. Melrose Gardens 1982 HM: 1984

AMA-NO-HANE Shimizu, Hiroshi Reg. 2002 SIB (29" 74 cm) M. S. absent; F. (6) light lavender, inconspicuous white signal. Parentage unknown. Windwood Gardens 2000

AMAZEMENT Wiswell, Gladys Martin Reg. 1972 SIB (dip.) (24" 61cm) ML Pale yellow self. Claimed to be a hybrid between a TB (Elsa Sass) and a 28-chr Siberian (White Empress). However, reports from Kevin Vaughn indicate the foliage was similar to pseudacorus, as were the seed pods, more like Dorthea K. Williamson. Siberian Iris Society 1973 HM 1976.

AMCHA Van Mulders, A. Reg. 1986 SIB (dip.) Unknown parentage. Jardinart Van Mulders 1997.

AMELIA EARHART Sass, H.P., By Scheffy Reg. 1937 SIB (dip.) E Unknown parentage. Kenwood 1939 .

AMETHYST ECHO Warner, Carol Reg. 2004 Sdlg. 5 SIB (tet.) (34" 86 cm) E & RE. S. amethyst-purple; style arms same with blue midrib; F. amethyst-purple narrowly edged white at haft, broken white signal. Parentage unknown. Draycott Gardens 2004.

AMY ARISTO Rebert, J. Owings Reg. 1999 Sdlg CB-97-11 SIB (dip.) (30" 76 cm) M Lavender-blue, F. with ivory to rust signal. Unknown parentage.

ANA MERCEDIS Rebert, J. Owings, Reg. 1996 Sdlg UG-4 SIB (dip.) (28" 71 cm) M S. light blue; F. light blue, dark blue veining through slight ivory signal, shoulders light yellow. Parentage unknown.

ANGENEHME SEEREISE Winkelmann, Artur Reg. 2002 Sdlg. 2/94 SPEC-X (sibtosa, tet.) (43" 110 cm) L. S. and style arms light violet-blue; F. medium violet-blue; lightly ruffled. Parentage unknown, seed from T. Tamberg.

ANGLESEY Foster, Harry Reg. 1986 Sdlg 12/78/231/83 SIB (dip.) (26" 66 cm) M Lightly ruffled violet-blue (RHS 93B) with purple lacing, golden green and white signal; fimbriated violet-blue (93C) styles. White Swirl X Ruffled Velvet. V. H. Humphrey 1995 ST (Wisley) 1986

ANN DASCH Varner, D. Steve Reg. 1977 Sdlg V5117 SIB (dip.) (38" 97 cm) ML Mottled light blue-purple with solid deeper blue-purple edges. 0129: (Gatineau x Dreaming Spires) X 0129: (Gatineau x Dreaming Spires). Illini Iris 1978 HM: 1980, MORGAN AWARD: 1983

ANNEMARIE TROEGER Tamberg, Tomas Reg. 1980 Sdlg SSTT 132 SIB (dip.) (41" 105 cm) M-L Light Mid-blue self, white throat, beautiful clump effect. (Cambridge x self) X Tealwood (Parentage corrected from an article by Dr. Tamberg in TSI Vol 7, #1, Page 27). Schoepfinger Gardens 1981 HC Wisley 1984

ANNICK McEwen, Currier Reg. 1986 Sdlg M76/93(7) SIB (dip.) (12" 30 cm) M Dark violet-blue (RHS 89C), veined darker (89A) on F.; white signal. I. "orientalis" nana X I. sibirica 'nana alba'. Seaways Gardens 1986 HM 1990

ANNIVERSARY Brummitt, Marjorie Reg. 1965 Sdlg #17/3 SIB (dip.) (30" 76 cm) M White self, yellow hafts. Wisley White X White Swirl. Orpington 1969 BRITISH DYKES MEDAL 1979

ANN RENN Hewitt, Jennifer Reg. 2004 Sdlg. YT889/9 SIB (tet.) (28" 71 cm) ML. S. white veined yellow at midrib; style arms white with green to yellow midribs, floret crests with (sometimes) fimbriated midribs; F. cream (near RHS 1D, green-yellow), deep yellow shoulders, green veins, signal green at hafts, outer area cream with green veins; ruffled, flaring. Harpswell Happiness X Golden Crimping.

ANN STAHLMAN Washington, Thomas Albione Reg. 1931 SIB (dip.) Soft blue self, with heart-shaped flowers and dainty foliage. Description from Robert Wayman Catalogue dated 1936; found at an estate sale. Unknown parentage. Nesmith 1931.

ANTICIPATION ORANGE Reid, Lorena Reg 1994 Sdlg 8S23-2J SIB 40 Chromosome (30" 76 cm) L S. pale orange crush, slightly deeper gold midrib; deep gold style arms, edged pale orange crush area. Clear yellow sdlg: I. chrysographes sdlg., maroon with white signal, x unknown) X self. Laurie's Garden 1994

ANUSIA Komarnicki, Lech Reg. 2005 Sdlg. 97/8 Sib 20-A SIB (dip.) (43" 110 cm) ML. S. sky blue; style arms light blue, aqua ribs, sky blue crests; F. sky blue, hafts light brown in throat, signal white, almost completely overlaid light yellow. Ueber den Wolken X Tamberg Sdlg. (Rejoice Always x Blue Rosebud)

AOTEA ROA McCashin, Mrs. Dorothy Reg. 1957 SIB (dip.) (24" 61 cm) Blue self. Madawaska X Ottawa.

APPALOOSA BLUE Bellagamba, Louise Reg. 1983 Sdlg S-179 SIB (dip.) (33" 84 cm) M S. medium blue dappled white on center edge; F. medium blue, dappled white on center edge. Unknown parentage. Borbeleta, Bellagamba 1984 HM: 1986

AQUA WHISPERS Miller, Anna Mae Reg. 1987 Sdlg 80.3.7 SIB (dip.) (36" 91 cm) M S. white, lavender at base; F. lavender (RHS 76A/B), veined violet-blue (91A), fine white edge, white-blue signal. 78-20-47: (Pink Haze x unknown) X Temper Tantrum. Old Douglas Perennials 1988 HM 1990; AM 1991; MORGAN-WOOD MEDAL 1995

ARABIAN PRINCESS Kokich, Mrs. Philliss Reg. 1973 SIB (dip.) (32" 81cm) L Light Moorish blue with deeper blue blaze on F.; blue signals veined cream. Towanda Redflare X unknown. Flowerville 1973

ARBEE Wood, John Reg. 1989 Sdlg W-101-71 SIB (dip.) (23" 58 cm) E Red-purple (RHS 72A), yellow green hafts with brown reticulation, white and purple signal; dark violet (86B) styles; slight fragrance. Towanda Redflare X self. J. Wood 1989 HM: 1991

- I. bulleyana Dykes, William Rickatson Listed 1910 SIB-SP 40 Chromosome (35 - 45") June-Aug Named by Dykes, from a plant raised in England in the garden of A. K. Bulley. Bulley received the seed from Forrest, which he had collected in China. Present material is somewhat different from Dyke's plate, and is probably from seedlings. Somewhat dubious origin, and it seems highly probable it is a hybrid of I. forrestii X I. chrysographes. Selfed, it produces a variety of forms, some rather like I. forrestii. In the wild, this and I. chrysographes occur in the same region. Wallace 1916
- I. chrysographes Dykes, William Rickatson Listed 1911 Collected in China SIB-SP 40 Chromosome (35-45" 89-114 cm) July-Sept. Reddish violet, broken by gold streaks in the center of the falls, with variations with gold lines absent, and others a deeper reddish color. Var. RUBELLA is a deep form which is in common cultivation. A beautiful garden plant, delicate flower markings, unbranched hollow stems, grey-green leaves 1 ½ cm wide; 2 fragrant flowers 6-7cm in diameter, drooping vertical falls. Occurs wild in China, in Yunnan & Szechuan provinces, and N.E. Burma at 4,000 to 12,000'. Barr 1915 AM RHS 1914, (Shown by Dykes).
- I. clarkei Baker, G. P. Listed 1892 Collected in Sikkim SIB-SP 40 Chromosome (24" 61 cm) May-July Mid blue-violet to dark blue or reddish-purple, with large white, violet-veined signal patch in the center of F.; hafts yellowish. 1-3 branches, each with 2 flowers 7-7.5cm in diameter with a different shape than other Sibiricae species, S. curved out to horizontal position, leaves broader (1.3-2cm) than in the other Sibiricae species. Only Sibiricae species with solid stems. Native to Nepal, Sikkim, Bhutan, Tibet, & Manipur region of NE India, at 7,500 to 13,000 ft. hillsides in damp grassland. Macoun; Van Tubergen Ltd 1916
- I. clarkei (BLUE) SIB-SP 40 Chromosome (30" 76 cm) Blue lavender with white signals. (Description from Laurie's Garden Catalog: 1988). Planted by the late Carl English, who managed the gardens at the Hiram Chittincha Locks in Seattle, from seeds received from overseas friends. Unknown parentage. ?? (In Commerce)
- I. clarkei (VIOLET) Collected Collected SIB-SP 40 Chromosome (30" 76 cm) Dark violet with white and gold signal lines; small seeds similiar to PCN's. (Description from Laurie's Garden Catalog: 1988). Originated by the late Carl English, in charge of the gardens at Hiram Chittincha Locks in Seattle. Unknown parentage. (From seeds sent by overseas friends). ?? (In Commerce)
- I. delavayi Micheli, Marc Listed 1895 SIB-SP 40 Chromosome (40" 102 cm) July-Aug Variable in color from light to dark purple-blue, sizeable white signal area in center of wide, rounded F.; S. inclined at an oblique angle rather than erect as in I. sibirica & I. sanguinea. Robust, reaching 3-5' high, grey-green leaves, 1-2 branches, each with 2 flowers 3-4" in diameter. Native of boggy areas of western Yunnan & South-western Szechuan provinces of China, at 9,000 - 12,000' altitudes. Needs lots of water during the growing season, requiring bog-like conditions. From collected seed. Van Tubergen 1900
- I. delavayi (YELLOW HYBRID) From collected seed. SIB-SP 40 Chromosome (48" 122 cm) L Tall husky plant; pale yellow flowers, grey-blue stitched lines on F. (Description from Laurie's Garden Catalog: 1988). Unknown parentage. ?? (In Commerce)
- I. dykesii Stapf, Dr. Otto Listed 1933 SIB-SP 40 Chromosome (36" 91 cm) This is a rather mystery plant, since it is of unknown origin, first flowering in Britain after Dykes had died. C. Grey-Wilson postulates that it might be of hybrid origin, as in I. bulleyana. The plant is like a vigorous I. chrysographes, with leaves 2 cm wide, grey-green with the unusual feature of sheathing the stem for most of its length. Flowers are a bright deep violet-purple with white & yellow veins in the center of F., somewhat larger than I. chrysographes. Current cultivars may vary in form. ?? (In Commerce)
- I. forrestii Named By Dykes Listed 1910 Collected SIB-SP 40 Chromosome (35"-40" 89-102 cm) June Scented flowers, 5-6 cm in diameter, clear yellow with brownish-purple lines on the haft of rather narrow F.; S. erect; slender linear leaves are glossy on one side and grey-green on the other and much shorter than the flower stems, which are unbranched with a terminal inflorescence of two flowers. Collected by George Forrest in western Yunnan China, but grows in south Szechuan and northern Burma. Found in alpine pastures at 6,000 - 13,000', flowering in June in the wild. Van Tubergen Ltd. 1916 AM RHS 1924
- I. forrestii (HYBRID) From collected seed SIB-SP 40 Chromosome (24" 61 cm) Gold flowers, slightly taller and more vigorous than the pure species. (Description from Laurie's Garden Catalog: 1988). Unknown parentage. ?? (In Commerce)
- I. orientalis Thunberg, Carl Peter Listed 1794 Collected SIB-SP Diploid BIM. Collected in Manchuria, Korea, Japan 1794. Now classified as I. sanguinea, the ONLY AIS ACCEPTED classification. Synonyms: haematophylla; Nertchinskia; Pratensis major; Sibirica sanguinea; sibirica var. orientalis; sibirica var. sanguinea; Xiphium orientale. Unknown parentage. Macoun; Farr 1912 ,
- I. sanguinea Hornemann. Ex Donn. Listed 1811 Collected SIB-SP (dip.) (30" 76 cm) E -L 2 or 3 reddish-purple flowers in each set of green bracts, 6-8cm in diameter, carried on equal pedicels; F. broad & orbicular with yellowish or orange haft, finely net-veined purple. S. small, erect; stamens have dark purple anthers. Foliage glaucous, 5 - 12mm wide, same height as flower stems. Found in mountain meadows, wet plains, light woods in south-eastern Russia, from east of Lake Baikal eastwards to Ussuri region, into Korea & Japan. Blooms May, June, or July in the wild. ?? (In Commerce)
- I. Sanguinea "U.S.O." Berlin, Eckard Collected SIB-SP (dip.) (42" 107 cm) Blue-violet. Collected in U.S.S.R.; "U.S.O." = Unidentified Siberian Object. Information from Jean Witt. Unknown parentage. ?? (In Commerce)
- I. Sanguinea 1615 Collected SIB-SP (dip.) (24" 61 cm) A white form of this Siberian species. Narrow and short white S., tucked white F., with the entire upper half yellow; two buds on very long pedicels. Said to originate in Nepal. (Description from Adamgrove Catalog 1987) Unknown parentage. ?? (In Commerce)

- I. Sanguinea 1616 Collected SIB-SP (dip.) (28" 71 cm) A blue form of this Siberian species, reportedly from Russia. prominent gap between style arms and hafts. Flanges of the F. are violet brown. (Description from Adamgrove Catalog 1987). Unknown parentage. ?? (In Commerce)
- I. Sanguinea Alba Listed Collected SIB-SP (dip.) (30" 76 cm) E-L A white form of I. sanguinea, usually with some purple veining, found occasionally in the wilds of Russia, Korea, and Japan. Unknown parentage. Wada 1937
- I. Sanguinea Kamayama SIB-SP (dip.) (36" 91 cm) Tall, vigorous rich violet, occasionally bears a branch. (Description from Adamgrove Catalog: 1987). Plant obtained from Japan by Jean Witt in 1968. "Kamayama" is the synonym of sanguinea in Japanese. Unknown parentage. ?? (In Commerce)
- I. Sanguinea Kobana SIB-SP (dip.) White; no blades to falls ("Kobana" is thought to refer to the fact there are no blades in the falls). Information from Jean Witt. Obtained from Japan in 1968 by Jean Witt. Unknown parentage. ?? (In Commerce)
- I. Sanguinea var. Violacca Sdlg Collected SIB-SP (dip.) (30" 76 cm) E -L A deep violet form of I. sanguinea, with larger standards than the usual form, said to have originated in Korea. Collected in Manchuria.
- I. sibirica Linnaeus, Carolus Listed 1753 Collected in Europe SIB-SP (dip.) (50" 120 cm) M Blue or blue-violet dark-veined flowers, 6-7cm in diameter, 2, 3, or more buds from each set of brown papery spathes; F. oblong, with a white, strongly violet-veined area in center, narrowing to a paler haft which has prominent dark veining. S. smaller, more uniformly blue-violet. Branched stems well-overtopping the narrow leaves, usually green and up to 4cm wide. Found from northern Italy eastwards through eastern Europe to Russia, west to Lake Baikal in wet meadows and damp forest margins, May to July. Dickson 1794
- I. typhifolia Kitagawa Zhao, Prof. By James Waddick Reg. 1990 Collected in China SIB (dip.) 28 Chromosome (24" 61cm) E-M S. deep reddish-violet; F. same, paler at hafts. Native to N.E. China.
- I. wilsonii Wright, C. H. Listed 1907 SIB-SP 40 Chromosome (60-75" 152-191 cm) July Fragrant pale yellow flowers with broad obvate F., veined and dotted purple-brown, especially in center and on haft. 6-8cm in diameter, S. held at an oblique angle. Grey-green leaves (both sides), same height as unbranched stems, which produce 2 flowers. Found in China, and known to occur in provinces of western Hupeh and western Yunnan and Shensi and Szechuan, on rocky hillsides at elevations of 7,000 - 12,000', along the margins of streams and in alpine meadows. Flowering in July in the wild. Barr 1915
- I. wilsonii Purple SIB-SP 40 Chromosome Golden yellow; much spotted purple-brown. (Info from Jean Witt). Unknown parentage. Richland Nursery
- IAN Burge, Thomas Reg. 1990 Sdlg T21/86 SIB (dip.) (29" 75 cm) M S. ruffled mid light blue with traces of mauve; prominent style arms; F. mid blue with traces of violet; white signal veined blue, yellow in throat. T31/84: (Dear Diane x Happy Event) X sib. SC, STW (BIS) 1988
- IANTHIS Spender, Major R. E. S. Reg. 1943 SIB (dip.) L-M B1M. Wallace 1948, 1952/3: Strong growing large open flowers, dark blue. Information courtesy of Jennifer Hewitt from BIS & RHS Libraries. Emperor sdlg X sdlg. Wallace 1943

(In an article in TSI: Vol7, #1, Dr. Tamberg states BREITER START was the POLLEN parent, not pod parent, with SSTT 101 being a cross from McEwen Tet sdgls.). Schoepfinger Iris Garten 1983

THE MORGAN AWARDS

Currently, the Morgan-Wood Medal is the top award voted exclusively to a Siberian iris by accredited judges of The American Iris Society. The variety must have previously received an HM, and after a minimum of two years, been voted an AM. The Morgan-Wood Medal, first issued in 1986, replaced the Morgan Award, first awarded in 1952. The Morgan Award was the equivalent of the AM award for other iris classes. These awards are named in honor of F. Cleveland Morgan (1882-1962) and Ira E. Wood (1903-1977).

F. Cleveland Morgan was a pioneer Canadian breeder of Siberian irises and a founding member of AIS. Some of his magnificent cultivars still enhance gardens around the globe. Three of his best known irises are Caesar, Caesar's Brother, and Tropic Night. Educated in England and Switzerland, he was a director of the Henry Morgan Company and a patron of Canadian arts.

Morgan's association with the Montreal Museum of Fine Arts spanned a period of forty-five years including 8 years as president of that institution. The museum held a special exhibition in 1961 to display more than six-hundred works of art that he had donated. AIS instituted the Morgan Award for Siberian Irises in 1961 which was the predecessor of the Morgan-Wood Medal.

Ira E. Wood, who was known as Sandy to his friends, and his wife Betty were both scientists who worked for Bell Telephone Laboratories in New Jersey. They shared their iris hobby and were active in the activities of AIS and the Society for Siberian Irises. They often undertook iris society projects as a team and one of these was the production of the Handbook for the American Iris Society Members and Officers. In 1974, AIS awarded them both the Distinguished Service Medal. Wood hybridized Siberian irises but he introduced only one cultivar, Ong's Hat. He also served as a director of AIS and as its second vice-president.

(Appreciation is expressed to Clarence Mahan for the above information.)

THE MORGAN AWARD

1952	Tycoon	Mrs. Frances Cleveland
1952	Eric The Red	Mr. Fred R. Whitney
1953	Caesar's Brother	Mr. F. Cleveland Morgan
